

## *SIGCOM Mentors Small NC Business*

**Greensboro, North Carolina, February 15, 2006** - SIGCOM INC, a leading systems integrator in the fields of Visual Communications and Security Solutions, announces that they are in the process of becoming a mentor to a protégé company, STA Technologies, in all facets of business operations including finance, sales & marketing and engineering. The "Mentor Protégé" program is sponsored by the Small Business Administration and the focus is to enable small companies to benefit from the proven business processes & practices of a larger successful company. Elmer Baugess, SIGCOM mentor, stated that "If we do this right, STA Technologies will need our guidance & resources less and less over time and one day in the future, not at all"

### **About SIGCOM INC**

SIGCOM is a leading systems integrator that focuses on the design and integration of video communications and security solutions for Federal Government clients. In an environment in which information technology and physical security transport are converging, SIGCOM's particular strength is the ability to develop multi-discipline turnkey network infrastructure solutions that exploit commercial off the shelf products. Their world class service and technical support team have designed and implemented a full range of security systems and force protection solutions for the US Prisons market, the Department of Defense, Smithsonian, Special Operations groups, and the Intel community worldwide.
