

*SIGCOM, Inc. Wins Navy's SPAWAR Video Teleconferencing Upgrades Damaged
by Hurricane Katrina*

Greensboro, North Carolina, May 25, 2006 - SIGCOM INC, a systems integrator specializing in Visual Communications and Security Solutions was awarded \$1,444,000 by the Navy's SPAWAR Systems Center in New Orleans (SSC New Orleans) to replace visual communications systems damaged by Hurricane Katrina. SIGCOM has had a long-standing relationship with SSC New Orleans beginning with the design and implementation of visual communications systems for all floors of the first three buildings constructed in the 2000 timeframe.

SSC New Orleans has an extremely important mission in providing customer support 24 hours/day, 365 days/year for members of the Navy throughout the world. They provide support for nine key systems including *Navy Standard Integrated Personnel System, Medical Readiness Reporting System and Reserves Headquarters Support*. Twenty rooms of the hurricane damaged facility are expected to require visual communications equipment replacement and technology refreshment. Twenty three high resolution projectors, updated room control touch panels, multimedia lecterns, new video teleconferencing codecs and a new multipoint control system with management software suite are among the upgrades.

"The systems replaced will be upgraded with state-of-the-art products. SPAWAR Systems Center is an important customer to us and we welcome the opportunity to support them in carrying out their mission in New Orleans" stated Bob Otto, COO at SIGCOM.

About SIGCOM INC

SIGCOM is a leading systems integrator that focuses on the design and integration of video communications and security solutions for Federal Government clients. In an environment in which information technology and physical security transport are converging, SIGCOM's particular strength is the ability to develop multi-discipline turnkey network infrastructure solutions that exploit commercial off the shelf products. Their world class service and technical support team have designed and implemented a full range of visual communications and security solutions for the US Prisons market, the Department of Defense, Smithsonian, Special Operations groups, and the Intel community worldwide.
