

A/V Solution Set – A/V Presentation System

P/N AVSS2PSYS1000.1 "Now available on our GSA Schedule"

The "A/V Presentation System" audio/video solution is housed in a 48-inch tall rack that combines furniture elegance with a robust rolling steel enclosure that incorporates an attractive graphite finished top and includes one drawer for storing the infrared controller and connection cables. The "A/V Presentation System" includes one VCR (set up to play and record), one infrared control system, one computer interface, one scan converter, video and audio switchers, and audio equalization and amplification with one (1) set of ceiling mounted stereo speakers. The "A/V Presentation System" includes connectors so its user can connect up to three component video sources and four composite video plus stereo audio sources at once, and also includes one composite video plus stereo audio auxiliary output. The "A/V Presentation System" also comes with two (2) wall plates for clean connections to field wiring. The display devices are not included and can be purchased separately from SIGCOM Display Solutions that include traditional CRT monitors, plasma displays and projection system. Price includes engineering, onsite installation and training, and travel.
