

## *8-Port Secure MCU Patch System*

**P/N SECMCUPATCH0100.1**

### **8-Port Secure MCU Patch System**

The SIGCOM 8-Port Secure MCU Patch System allows users to easily switch routing of data between secure and un-secure modes.

The expandable system includes two 18-slot base chassis, eight Red Patch Modules, eight black modules, 10 black blank panels, 10 red blank panels, 32 data circuit guards, and necessary interface cabling. The unit is rack-mountable and is compatible with Polycom (Accord), Tandberg and Compunetics Multipoint Control Unit (MCUs).
