

## *Mirage 1200*

### **P/N SIGC-Mirage-1200**

A lightweight, hand held device for the detection of optic and opto-electronic equipment. The unit is equally effective in seeking out any optical device whether passive, active, laser or thermal; it works at night or in the daylight at a distance up to 1200 meters. It uses only four watts of D.C. or A.C. power. This system is great at detecting hidden pinhole cameras in a room or finding who may looking at the user via binoculars or gun scopes.
