

## *FLIR Sensor*

### **P/N SIGC-TP-IR-1M1-20**

#### **FLIR Sensor**

The SIGC-TP-IR-1M1-20 is a very low cost handheld forward looking infrared (FLIR) sensor designed for visual monitoring of thermal emissions from objects. It has two user selectable temperature ranges. In high temp mode it visualizes mechanical targets (engines, aircraft, artillery, tanks). In low temp mode, it visualizes humans and animals. The unit is effective with little illumination, is ergonomic in design, light and small in size. The aluminum body is designed for field/industrial usage. The unit comes with a 75 mm lens and two optional lenses, 50 mm and 120 mm.
