Large Room Video TeleConferencing (VTC) Solution

The SIGCOM VTCLGCOM1000.1 Large Room Video Tele conferencing (VTC) solution is designed to be integrated into a room up to 1200 square feet (50 foot by 24 foot) with an audience of 12 to 25 or more participants. The Large Room suite of equipment features high-quality audio and video that can be transmitted from and received from any industry standard ISDN (H.320) or IP (H.323) endpoint or bridge—either dial-up or dedicated, and T.120 computer application collaboration. The Large Room solution employs a H.320/H.323/T.120 standards compliant multi-feature, multi-interface video teleconferencing Coder/Decoder (CODEC). Included in the Large Room VTC Solution is: a stylish 44-inch tall studio rack with graphite top to house the electronics; a computer interface; an audio subsystem that includes an automatic microphone mixer with integrated echo canceller with eight (8) microphones, a graphic equalizer, and an amplifier with four (4) speakers; an integrated control system with 10-inch color touch panel; a VCR; a document camera, three (3) remote controlled Pan, Tilt, and Zoom camera supporting presets and all required audio, video, control, and data cables, connectors, and wall plates. The solution is designed to operate with either single or dual display devices. Engineering and installation services, on-site user orientation training and travel are included.

The display devices are not included and can be purchased separately from SIGCOM Display Solutions that include traditional CRT monitors, plasma displays and projection systems.
