10-Zone 3000 to 10-Zone 5000 Controller Expansion

The "Controller Expansion" option provides the capability to expand a 10-Zone 3000 Controller to a 10-Zone 5000 Controller. The system includes the upgrade hardware and software for the Controller. Note: The "Controller Expansion" option must be specified at time of initial order. This option does not include field devices and peripheral headend equipment. This option is the headend controller upgrade only.
