

Small to Medium Access Control Base System

Access Control System with Optional Components

SIGCOM's Access Control System is ideal for facilities where security is vital and access to certain areas must be controlled and monitored. Through the management and monitoring of multiple access points, these systems provide efficient security measures and allow for quick response to any security breach.

P/N ACMSSEC500.1

Small to Medium Access Control Base System

The Small to Medium Access Control System is designed around those facilities requiring a full featured Access Control System where a range of four (4) to thirty two (32) card readers meets the user requirements (16 doors - dual reader per door configuration) or (32 doors - single reader per door configuration) or mix or match as needed.

The system consists of a PC Based Access Control System and enough door hardware to enable the minimum of four (4) doors with four (4) card readers (one reader per door – second reader per door is optional) and includes the following equipment:

- PC Server & 17" Color Monitor with Access Control Software and License
- Continuous Feed Event Printer
- Intelligent System Controller
- Card Reader Interface For Up To Four (4) Card Readers with Enclosure, Key Lock, Power Supply and 12V, 12AH Battery Kit.
- Four (4) Surface Mount Proximity Card Readers
- Two-Hundred (200) Proximity Cards, with Clips
- Four (4) Surface Mount 1200 Lb. Holding Force Magnetic Door Locks
- One (1) Lock Power Supply with Fire Alarm Relay for up to 8 Doors (Distance Dependent)
- Four (4) Surface Mount Door Contacts with Armored Cable
- Four (4) Emergency Exit Push Buttons
- Four (4) REX Motion Detectors
- System Manuals (On CD)
